

PLUGINS

ANALOGUE FEEL IN A DIGITAL WORLD

PRESS RELEASE – OCTOBER 1st 2014

LINDELL AUDIO ANNOUNCE NEW SOFTWARE PLUGIN RANGE

Lindell Audio has launched a new venture this month in the shape of Lindell Plugins. Modelled upon the hugely popular and highly affordable 500 Series Hardware 6X-500, 7X-500 and PEX-500 analogue processors, the Lindell software versions build upon this pricing strategy with all 3 modules available to download at \$99/£59/€79 per individual plugin. There is also a Channel X bundle available that comprises of all 3 hardware emulations along with the Channel X – Super Channel all for \$249

Building upon feedback submitted by Lindell hardware users in the field, Tobias Lindell has chosen to implement these highly requested features into the software versions, offering a fine set of process tools for use in DAW platforms. The Plugins are available as RTAS/AAX/VST and AU formats in both 32bit and 64bit architecture and include an 1176 Styled FET Compressor, a Pultec Styled EQ and a Classic MicPre emulation with high and low boost offering analogue drive and saturation.

CHANNEL X

Full Channel Strip Package

The Channel X bundle contains all 3 individual plugins plus a Channel X mega channel strip.

- [6X-500](#) preamp / filters plugin
- [7X-500](#) FET compressor plugin
- [PEX-500](#) passive EQ plugin
- \$249

7X-500

PEX-500

6X-500

7X-500 – FET Compressor

The Seven X Five Hundred is a mono/stereo channel compressor/limiter. It's a FET (field effect transistor) design incorporating features such as "High Pass Sidechain Filter", "Mix Knob" mix between dry and wet signal (parallel compression).

The 7X-500 is our take on the classic "1176 Sound". It can be smooth or it can be a rock'n'roll monster when using ratio 100:1 (all in).

The 7X-500 plugin is a direct evolution of our [hardware](#). It adds the most requested features from our users :

- Variable Attack/Release
- Stereo link mode
- \$99/£59/€79

PEX-500 – Pultec Styled EQ

The PEX Five Hundred is a mono/stereo channel transformer coupled Passive Pultec inspired Equalizer. It's an all discrete design based upon our hybrid amplifier.

The Equalizer is our take on the magical classic Pultec design. It's got smooth silky high end and the most punchy low end you can get.

The PEX-500 plugin is a direct evolution of our [hardware](#). It adds the most requested features from our users :

- More High Frequencies Values
- Stereo Mid/Side Matrix
- \$99/£59/€79

6X-500 – Classic Analogue Microphone PreAmp and mini Pultec EQ

The Six X Five Hundred is a mono/stereo channel transformer coupled Preamplifier and Passive 2 Band Equalizer. The Preamp is an all discrete design based upon our hybrid amplifier.

The Equalizer is our take on the magical classic Pultec design. It's got 15dB boost of smooth silky high end and the most punchy low end you can get.

The 6X-500 plugin is a direct evolution of our [hardware](#). It adds the most requested features from our users :

- High And Lowpass Filters
- Variable Slopes
- Wide Distortion Range
- \$99/£59/€79
